

PRODUCT IDENTIFICATION

PRODUCT NAME: **Hammer Clean** (Biodegradable Degreaser)

GENERAL DESCRIPTION

If you need to know how to clean grease from concrete driveways, how to clean cooking grease off concrete, or where to find grease cleaning equipment – Bionex Technology's Hammer Clean is the answer! Hammer Clean is a powerful customizable degreaser for cleaning stubborn soil and grease. It can clean grease off of concrete and can tackle the clean-up of metal, tile floors, equipment, and tanks.

Hammer Clean consists of oil-eating communities of microbes that have the ability to effectively convert harmful hydrocarbons, oils, and greases into non-toxic compounds. This product also lowers LELs (flammability), making it the right product to use in emergency response situations. Like all our oil bioremediation products, it is safe, natural, and non-toxic.

TYPICAL PROPERTIES

- Color - Bluish Green
- pH, 1% Solution - 9.5
- Specific Gravity - 1.055
- Odor - Soapy

INSTRUCTIONS

DIRECTIONS TO CLEAN GREASE ON CONCRETE AND OTHER SURFACES

Combine 5 to 6 ounces of Hammer Clean per gallon of water and then apply on the surface.

Application methods include brushing, wiping, or spraying on the area. Bacterial treatment will continue treating the surface during cleaning and in applicable wastewater drain lines. Use Endurance full strength in an agitated or static parts washer.

Note: Only mix the amount needed for each cleaning process.
