

**PRODUCT IDENTIFICATION**PRODUCT NAME: **Vapor Venom** (Liquid)

PRODUCT CODE: 22023

**GENERAL DESCRIPTION**

Vapor Venom is a hydrocarbon encapsulation agent that suppresses volatile organic compounds and reduces LELs (flammability). More specifically, this product will attack the surface of hydrocarbon particles by encapsulating the oil droplets preventing hydrocarbon vapors from being released. This product is excellent for reducing LELs in tanks or vessels requiring entry for cleaning and maintenance activities. It can also be used during hydrocarbon spill cleanup and as a degassing agent for pipelines.

**TYPICAL PROPERTIES**

- Color - Blue
- pH, 1% Solution - 9.5
- Specific Gravity - 1.01 - 1.02
- Odor - Soapy

**INSTRUCTIONS****HOW TO SUPPRESS HARMFUL VAPORS USING VAPOR VENOM**

Dilute 1:5 to 1:20 with water and then spray on the product surface.

For large tanks or vessels apply inside the vessel with water cannon or fire hose while properly agitating tank contents.

Brushing or wiping the diluted product on the hydrocarbon area are other satisfactory application methods.

Note: Only mix amount needed for each cleaning process.
